Speech and Language Therapy Bulletin May 2019

Articles

The following journal articles are available from the Library and Knowledge Service electronically or in print. Please follow links to access full text online, contact me to order copies, or call into your nearest library.

**Acquisition and Generalization Responses in Aphasia Naming Treatment: A Meta-Analysis of Semantic Feature Analysis Outcomes.**
[These results provide group-level evidence for the efficacy of SFA as well as preliminary estimates of how much naming performance benefit is engendered by varying dosages of SFA. The results also provide promising and previously unobserved evidence of potential person-level predictors of SFA treatment response.]

**Music-based interventions for aphasia could act through a motor-speech mechanism: a systematic review and case–control analysis of published individual participant data.**
[Music-based interventions for language production in aphasia may act via a motor-speech mechanism. We suggest that music and singing-based therapies might be further investigated as treatment options for patients with motor-speech disorders, whether associated with aphasia or not.]
