**Xpert MTB/RIF and Xpert MTB/RIF Ultra for pulmonary tuberculosis and rifampicin resistance in adults.**
Horne DJ. *Cochrane Database of Systematic Reviews* 2019;6:CD009593.
[Xpert MTB/RIF (Xpert MTB/RIF) and Xpert MTB/RIF Ultra (Xpert Ultra), the newest version, are the only World Health Organization (WHO)-recommended rapid tests that simultaneously detect tuberculosis and rifampicin resistance in persons with signs and symptoms of tuberculosis, at lower health system levels. Since the previous review, new studies have been published. We performed a review update for an upcoming WHO policy review.]

Events

For more information, please contact ellena.badrick@manchester.ac.uk.

Websites
The following website(s) may be of interest:

**Detecting Cancer Early Research Priorities Survey: Have your say which areas of cancer research are important to you.**
[https://psp.optimalworkshop.com/optimalsort/pspsurvey]
[Between December 2018 – February 2019, the NIHR Manchester Biomedical Research Centre carried out a survey to identify under-researched topics in cancer research that could help detect the disease sooner. For the next phase of the study, they want your help by choosing 10 of these questions which you]
feel are the most important. You can do this by clicking the link above and following instructions for the online survey.
The survey closes Sunday 4 August
