**Effects and cost-effectiveness of postoperative oral analgesics for additional postoperative pain relief in children and adolescents undergoing dental treatment: Health technology assessment including a systematic review.**
Berlin H. *PLoS ONE* 2019; doi.org/10.1371/journal.pone.0227027.  
[There is no scientific support for the use or rejection of oral analgesics administered after dental treatment in order to prevent or reduce postoperative pain in children and adolescents. Thus, no guidelines can be formulated on this issue based solely on scientific evidence. Well-designed studies on how to prevent pain from developing after dental treatment in children and adolescents is urgently needed.]

**Improving preoperative haemoglobin using a quality improvement approach to treat iron deficiency anaemia.**
[Conclusion: Our QI approach to treat preoperative iron deficiency anaemia has been successful in a heterogeneous ‘real-world’ clinical situation. This sustainable change could be replicated in other preoperative assessment services and to this end we feel that this work should be made available for others to learn from. The work has been disseminated and presented locally; and won local QI prizes.]

**Interprofessional simulation training in difficult airway management: a narrative review.**
[The aim of this narrative literature review was to explore the impact of interprofessional simulation-based team training on difficult airway management. The Fourth National Audit Project of The Royal College of Anaesthetists and The Difficult Airway Society identified recurrent deficits in practice that included delayed recognition of critical events, inadequate provision of appropriately trained staff and poor collaboration and communication strategies between teams.]

**Patients’ and healthcare workers’ recommendations for a surgical patient safety checklist - a qualitative study.**
This study aims to identify what the patients and healthcare workers find to be the risk elements that should be included in a patient-driven surgical patient safety checklist. Developing a surgical safety checklist based on these risk elements might reduce complications and unwanted errors.

**Practising personalised care. [Comment]**
Mello M. *British Journal of Nursing* 2020;29(2):82.

*The NHS Long-Term Plan sets out a commitment to rolling out the comprehensive model for personalised care so that it reaches 2.5 million people by 2023/24 (NHS England and NHS Improvement, 2019). This model aims to support a more individualised approach to health care by reframing the relationship between people/patients and clinicians. It advocates a better balance between ‘what's the matter with you?’ and ‘what matters to you?’.*

**Reports**

The following report(s) may be of interest:

**An organisation losing its memory? Patient safety alerts: implementation, monitoring and regulation in England.**
Action Against Medical Accidents; 2020.  
"...reveals serious delays in NHS trusts implementing patient safety alerts which are one of the main ways in which the NHS seeks to prevent known patient safety risks harming or killing patients. Compliance with alerts issued under the now abolished National Patient Safety Agency and NHS England are no longer monitored – even though patient safety incidents continue to be reported to the NHS National Reporting and Learning System."

Freely available online

**Staffing for Safe and Effective Care in the UK 2019 report: Reviewing the progress of health and care systems against our principles.**
Royal College of Nursing (RCN); 2020.  
[This report provides an overview of progress made against the safe staffing campaign principles during 2019. It includes country-specific updates as well as a look ahead to priorities during 2020.]

Freely available online

**The characteristics of effective clinical and peer supervision in the workplace: a rapid evidence review.**
Health and Care Professions Council (HCPC); 2020.  
[This report presents the key findings from a literature review: to explore the characteristics of effective clinical and peer supervision in the workplace.]
